

Getting to Investigation Headquarters

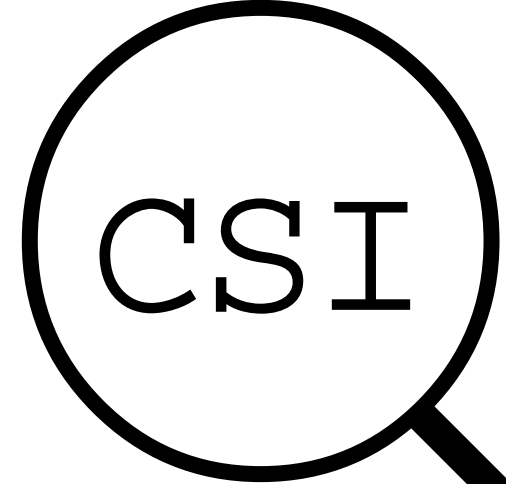

The Natural Resources Education Center is located within Ft. Harrison State Park on the northeast side of Indianapolis.

From I-70, take the Post Road exit north until Post Road ends. Turn left into the Park and follow the to the NREC.

From I-465, take the 56th Street exit east to Post Road. Turn left and proceed until Post Road ends. Turn left into the Park and follow signs to the NREC.

Environmental

a joint NREC workshop
where "who done it" may be
YOU!

Wednesday, November 2, 2005
Natural Resources Education Center
Ft. Harrison State Park

A fish die-off has occurred in the watershed surrounding the town of Gray Area. Evidence of this problem began appearing about five years ago, and local officials have now decided to launch a full-scale investigation to determine what is causing the fish to die and who might be responsible. You have been summoned to Investigation Headquarters to assist in this probe. Of course, keep in mind that everyone who answers the summons is a potential suspect!

What to expect

Plan to arrive for a brief interrogation and mug shot at 8:30 a.m. The investigation will begin promptly at 9:00 a.m., and we expect to crack the case and identify the perpetrator(s) by 4:00 p.m. Don't worry about bringing a lunch--the guys in the lab will cook up something; and we'll give you a little time off for good behavior to eat (so you'd better be good).

Throughout the day, you'll be examining evidence, conducting lab tests, listening to witness interviews and consulting with a fisheries biologist. If you're lucky, you'll be cleared of any wrong-doing; if you're a good crime scene investigator, you'll solve the case!

This workshop is being presented by the staff of the Indiana DNR's Natural Resources Education Center. The Center's mission is to provide professional training and support for educators and volunteers to promote responsible stewardship of our natural resources. The Center houses five of DNR's principle educational programs:

Go FishIN teaches young people about Indiana's aquatic resources through fishing.

Hoosier Riverwatch is a volunteer stream monitoring and water quality education program.

Project Learning Tree uses the forest to help students gain an awareness and knowledge of the world around them.

Project WET promotes awareness, appreciation, knowledge, and stewardship of water resources.

Project WILD teaches wildlife ecology and management concepts to enable students to make informed decisions.
